Retrofit Kit Software

“The Retrofit Kit transforms my cutter into a modern Finishing device!”

Live camera view with detected video mark

Workflow Manager with Quick Layers

Key Functions

- The camera detects so called video marks in different numbers, shapes and colors and so allows processing of challenging materials like highly reflecting silver foil..
- Its integrated Workflow Manager automates the whole finishing process and supports even the most inexperienced user.

Retrofit Kit

The Retrofit Kit is a set consisting of: **production software + camera**

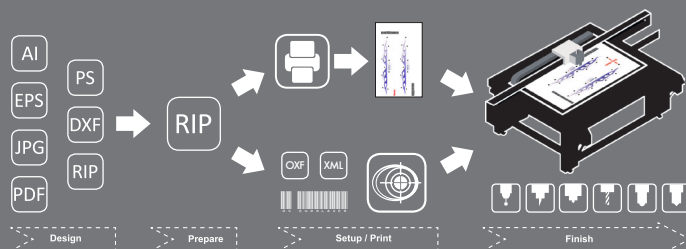

Retrofitting with a camera and finishing software your cutter can cut, through cut or mill printed materials contour exactly; inaccuracies that occur during the printing process will be corrected automatically by the software. Equipped with our Retrofit Kit your aged cutter becomes a professional digital contour cutting system.

Key Benefits

- Modernizes your existing production machine
- Its open system architecture allows data import from design, illustration and CAD programs such as Illustrator, CorelDRAW, AutoCAD.
- Printed sheets, boards and rolls can be cut or through cut in one pass.

RIP Support

An interface for the data exchange is present in the following RIPs: Caldera, PosterPrint, TexPrint, Colorgate, Wasatch, PosterJet, CAD-link, MasterRip (IGEPA), ONYX, EFI, Prepare-it, GMG Production

Recommended for

- Zünd PN line (S-800, M-800, M-1200, M-1600, L-800, L-1200, LR-1600, LH-1600, L-2500, L-3000, XL-800, XL-1200, XL-1600, XL-2500, XL-3000, 2XL-3000, 3XL-3000) and Zünd P line (P-700, P-1200, P-2000)
- Wild TA line (Leica)

OptiScout

Retrofit Kit Camera

Camera for the retrofitting of multifunction cutters and milling machines

Big Camera

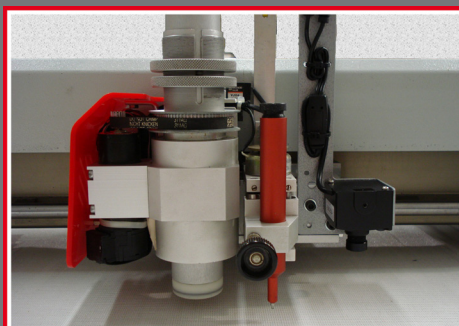

- CCD color camera with mit CS/C mount
- 1/3" CCD sensor Sony
- Pentax / Ricoh lens
- External USB video grabber
- Video cable (BNC)
- Mount / Box

Small Camera

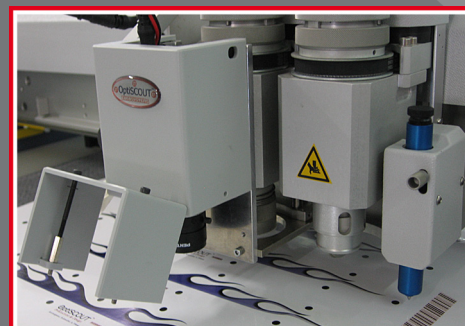

- CCD color camera with fix lens
- 1/3" CCD sensor Sony
- 12 V power
- External USB video grabber
- Video cable (BNC)
- Mount

OptiScout Camera on Wild TA 410

Small camera mounted on Tz head for Zünd P series

Big camera on Zünd multi tool head

Camera Retrofittable Devices

In principle all multifunction cutters can be retrofitted with a camera. This can be done by the manufacturer itself or an authorized specialist.

Camera Mounting

Authorized partners take care of installation and instruction. On request EUROSYSTEMS names a suitable partner.

Field of Application

Which camera is suitable for which device depends on the field of application, the mounting possibility and the sturdiness of the tool head base. We are happy to inform you which camera is recommended for your device. For this we need the exact device name and tool head of your device.
